

LANADOL AKTIV

Special cleaning and fibre protection agent for highly sensitive textiles for LANADOL wet cleaning

Properties

- LANADOL AKTIV is a highly active and mild special cleaning for wet cleaning.
- LANADOL AKTIV has excellent grease, oil and pigment dissolving properties and is optimised for classic wet cleaning application such as gentle mechanics and cold temperature range from cold to 30 °C.
- Outstanding tenside performance and fibre care finishes.
- LANADOL AKTIV protects highly sensitive textile fibres and especially wool against felting and shrinking in the wet cleaning process.
- LANADOL AKTIV has effective fibre protection properties and reduces the risk of bleeding and discolouration
- LANADOL AKTIV is very low-foaming
- LANADOL AKTIV is free of VOCs, phosphates, visual brighteners, EDTA, NTA and musk scents.
- LANADOL AKTIV meets the requirements for detergents and cleaning agents according to the Blue Angel award regulations for wet cleaning

Chemical-physical data

Appearance:	Clear, light yellow liquid
Density:	1.03 g/ml
Viscosity:	30 - 50 mPas
pH value:	6 - 7
Solubility:	Unlimited in water
Flashpoint:	Over 100 °C (PMCC)

Application

LANADOL AKTIV is recommended for wet cleaning highly sensitive textiles using the LANADOL SENSITIVE or LANADOL DRY process.

Standard concentration: 5 ml LANADOL AKTIV per litre (0.6 ozfl/gal) of bath/water.

LANADOL X-PRESS is recommended for wet cleaning less sensitive textiles and on tougher dirt in the LANADOL DRY process.

LANADOL X-PRESS not recommended for highly sensitive textiles (e.g. silk, angora, cashmere) and textiles with predominantly wool content

For further information on wet cleaning, please see the Kreussler *LANADOL brochure* or ask your *KREUSSLER field service employee*.

Notice:

The application of LANADOL AVANT is recommended for the pre-treatment of heavily soiled areas, in particular for the removal of oil and grease. We recommend the DEPRIT PROFESSIONAL product series for spot removal.

Storage and use

In closed containers, LANADOL AKTIV has a minimum shelf life of 24 months.

After exposure to frost, warm LANADOL AKTIV to at least 15 °C prior to use.

Store the product in a cool, dry place.

All information is accurate to the best of our knowledge. Use of the product has to be adapted to the respective application conditions. We assume no liability.
